## Standard VFD Application

### Does your facility qualify?

- Privately-owned, non-residential facility (public facilities are eligible through the Illinois Energy Now program; visit [www.illinoisenergy.org](http://www.illinoisenergy.org) for details)
- Electric delivery service rate DS2, DS3, DS4, DS5, or DS6 and Rider EDR surcharge on Ameren Illinois bill for all electric projects

### Does your project qualify?

- Installing new, energy efficient equipment
- New equipment meets eligibility guidelines as specified in this application
- Estimated project completion date is on or after June 1, 2016, and by May 31, 2017

### What you should know before beginning:

- Preapproval is **required** for ALL Standard Application projects requesting more than \$10,000 of incentive money. Do not purchase (including generating purchase orders) new equipment until receiving an official preapproval letter.
- Multiple incentive applications less than \$10,000 at the same facility within 120 days of each other will not be accepted. Phased projects requesting less than \$10,000 may submit separate applications when completion dates are at least 120 days apart.
- Stockpiles of equipment are not allowed: all incentivized material must be installed and operational.
- Projects must be completed within 120 days of equipment purchase date.
- Final application paperwork is due within 30 days of project completion.
- Electric projects are capped at \$500,000.
- VFD incentive applications are also capped at 75% of the project cost, which includes the costs of material and external labor (internal labor is not considered).
- Application paperwork can be submitted via email or hard copy. Emails that include “zip” files cannot be received. You will receive a confirmation email within two business days of submitting an application; please contact us if you do not receive a confirmation email.

### Participation instructions:

- Step One: Determine if your project requires preapproval. If the total incentive request is over \$10,000, preapproval is required.
- Step Two, Track A: If preapproval is required, submit the application for preapproval and do not purchase any material or generate purchase orders until a preapproval letter is issued. You will be notified if a pre-inspection is required.
- Step Two, Track B: If preapproval is not necessary, an application for “funds reserved” may be submitted, or the project may begin.
- Step Three: Within 30 days of project completion (all equipment installed and operational), submit a completed Incentive Payment Request form and all supporting documentation requested (or an entire application if not previously submitted). Applications are reviewed and approved projects paid within 60 days of approval.
- Step Four: Program staff may conduct a post installation verification inspection upon receiving final application paperwork.

\*Detailed, step-by-step instructions, FAQs, and other helpful information are available in the Application Guide ([www.ActOnenergy.com/portals/0/business/forms/application-guide.pdf](http://www.ActOnenergy.com/portals/0/business/forms/application-guide.pdf)).

## Variable Frequency Drive (VFD) for Pumping and Air-handling Applications (Measure Code BPM1)

### Eligibility Criteria for New Equipment

- Must be used in conjunction with pumping or air-handling applications.
- VFDs installed on HVAC fans, HVAC chilled water pumps, or HVAC hot water pumps should apply under measure BPC20 or BPC31 on the Standard HVAC/Water Heaters application.
- VFDs for air compressors, chillers, and non-centrifugal loads (pump or fan) are not eligible for this incentive, but may be eligible for incentives through the Custom application (which require pre-approval).
- Minimum equipment operating hours 2,000/year.
- Must be installed on an AC motor (DC motors are not eligible).
- Individual motors may not exceed 500 hp (over 500hp may be eligible under the Custom Program).
- Redundant/backup units do not qualify.
- Routine replacements of existing VFDs do not qualify.
- System must be controlled by differential pressure, flow, temperature, or other control variable.
- Application must have significant load diversity. Applications meant for power conditioning and other non-varying loads are not eligible.
- VFDs must be functional (installed and ready to operate) by May 31, 2017.
- External labor may be included in the project cost (but not internal labor). Project cost can include upgrade to VFD-compatible motors (if the VFD upgrade causes the motor to be replaced with a new VFD-compatible motor).
- Incentives are based on the new equipment being installed, not the equipment removed.
- Installations of new equipment with VFDs which are required by IECC 2015 are not eligible for incentives.

Technologies that purport to save energy through reduction of voltage, demand, or power conditioning are not Qualifying EEMs. EEMs that displace electrical energy use or natural gas to another fuel (i.e., fuel switching proposals) are not Qualifying EEMs. Other than geothermal projects, renewable energy projects (solar, wind power, etc.) are also not eligible for incentives under this program. Unless explicitly pre-approved, EEMs must be new and covered by warranties. Refrigeration tune-up program eligibility requirements are specified in the Specialty Equipment – Hospitality application. Natural Gas (gas) incentives do not include propane or butane measures.
