

**ENERGY EFFICIENCY  
PROGRAMS**

## IS VC<sub>x</sub> RIGHT FOR YOU?

### Virtual Commissioning can help with:

- High or irregular bills
- Managing unexpected increases in energy usage
- Lowering energy costs
- Assistance finding energy efficient solutions
- Learning when your building uses the most energy

# VIRTUAL COMMISSIONING

## Easily learn where energy is wasted and how you can save on your bills!

Virtual Commissioning (VC<sub>x</sub>) is a **FREE** service that can help you pinpoint where your facility is wasting energy, potentially reducing energy usage by 11 to 17%. An expert Energy Advisor will remotely analyze data drawn from your Ameren Illinois smart meter and provide recommendations for low-cost and no-cost improvements to your facility's operations that can immediately reduce your energy bills. Take advantage of this **FREE** service today.

## What To Expect

**STEP 1** - An Ameren Illinois Energy Advisor reviews your smart meter data

**STEP 2** - The Energy Advisor presents customized low-cost and no-cost recommendations to you

**STEP 3** - You take action to implement savings recommendations

**STEP 4** - Your Energy Advisor calculates your savings and reports back to you

## ENERGY PROFILE & OPPORTUNITY REPORT

AURORA SERVICE CENTER  
3/28/2019

### 5 OPPORTUNITIES IDENTIFIED

PRIORITY	ISSUE IDENTIFIED	ACTIONS	SAVINGS POTENTIAL
1	Weekend usage high in mornings & evenings	Check HVAC scheduling	\$720 / yr
2	Baseload use high while unoccupied on week days	After hours walkthrough	\$340 / yr
3	Early morning start up opportunity	Check HVAC scheduling	\$200 / yr
4	Consistent on/off cycling of device (large air compressor?)	Timer could be used to limit usage hours	\$1,150 / yr
5	Some other opportunity here	Look into evening usage	TBD
			\$2,410 / yr

## RECEIVE FREE EXPERT ENERGY EFFICIENCY ADVICE!

**“The Virtual Commissioning team is providing our organization with an incredible opportunity to better understand our energy usage, identify and quantify energy savings opportunities and help make those reductions more sustainable.”**

### Can I lower my energy bill?

Virtual Commissioning will help you identify energy saving opportunities such as:

- Adjusting heating and cooling schedules to better match actual occupancy
- Automatically turning off unneeded equipment overnight using smart timers
- Managing equipment start-up and shut-down schedules to reduce waste
- Identifying energy saving opportunities through an after-hours walkthrough
- Delamping or better control of natural lighting
