

Municipal Street Lighting

**ENERGY EFFICIENCY
PROGRAM**

Upgrading streetlights to high-efficiency LED technology can help municipalities substantially reduce energy and operations costs. The Ameren Illinois Energy Efficiency Program can provide incentives to help your municipality become more energy-efficient with LED street lighting.

BENEFITS OF LED STREET LIGHTING

Street lighting can account for as much as 40% of a municipality's energy budget. Older, less efficient technologies are more prone to failure and costly to maintain, adding to lighting costs.

By upgrading to high-efficiency LED-based fixtures, municipalities can reduce energy and operations costs by as much as 30–50%, saving taxpayers thousands of dollars.

Advantages of LED lighting:

- Reduce energy usage — LED streetlights use about 50% less energy.
- Longer life and lower maintenance costs.
- Improved quality of light and more uniform illumination for better security.
- Able to be networked or integrated with controls for enhanced safety.
- Increased sustainability — LEDs contain no toxic materials and are recyclable.

If your community has been looking for ways to further reduce energy usage and cut down maintenance costs, an upgrade to LED street lighting could be the perfect fit.

INCENTIVES

Replace Existing Streetlight With LED:

WAS: \$0.75/watt

NOW: \$1.25/watt reduced

LED Traffic and Pedestrian Signals:

\$20/lamp replaced

New LED Streetlight:

\$70/streetlight

PROGRAM ELIGIBILITY

Municipalities within the Ameren Illinois service territory (regardless of electricity supplier) are eligible to receive incentives for the replacement of municipality-owned streetlights with qualified LED street lighting products.*

REAL RESULTS

With the help of Ameren Illinois Energy Efficiency Program incentives, the city of Peoria upgraded 4,000 city-owned cobra-head streetlights as well as 6,000 outdated city-owned high-pressure sodium streetlights to LED lighting. The new, long-lasting LED lighting is expected to save the city \$200,000 in annual energy costs.
