

**ENERGY EFFICIENCY
PROGRAM**

2025 Community Partner Marketing and Communications Toolkit

The Ameren Illinois Energy Efficiency Program wants to ensure our Community Partners have the resources needed to help customers save money and reduce their energy bill. This Marketing and Communications Toolkit is designed to support our Community Partners with pre-approved content while providing your clientele with energy-saving information.

Single-Family Home Efficiency Income Qualified Initiative (HEIQ)

Overview

The first step in determining how efficient a home is and where it might be wasting energy is through a FREE Home Energy Assessment. An Energy Advisor will review the home's energy performance, including a home's energy features and household energy consumption patterns.

Eligibility

A residential customer is eligible for a free Home Energy Assessment through HEIQ if they meet the following qualifications:

- Live in a single-family home.
- Must be an Ameren Illinois residential customer heating their home with gas or electricity delivered by Ameren Illinois OR an Ameren Illinois residential electric customer heating their home with propane.
- Maximum gross annual household income is at or below the amount listed on the Income Qualification Chart.

Website

To find more information, to see if you qualify and to apply, visit AmerenIllinoisSavings.com/SaveMoney.

Talking Points

- A Home Energy Assessment identifies ways to bring your home's energy efficiency up to its highest potential to reduce energy costs. This special, free offering is available to income qualified individuals throughout the Ameren Illinois service territory.
- Benefits of our Home Energy Assessment include:
 - **Health and Safety** — Uncover hidden problems that could be wasting energy and making your home unsafe, like poorly insulated walls and improper ventilation. At a customer's home, a leak was found in her gas stove during her Home Energy Assessment. The issue was promptly corrected, leaving her home safe and sound.
 - **Savings** — Identify opportunities to receive energy-saving upgrades at little or no cost, such as improved insulation, heating equipment and ventilation.
 - **Free Energy-Saving Products** — During the Home Energy Assessment, receive FREE installation of energy-efficient products in your home, including LED lighting, faucet aerators and an advanced power strip.

Electrification

Overview

Switching to heat supplied through electricity instead of propane not only saves a customer money on heating costs, but also gives them the convenience and reliability of using Ameren Illinois electric already being used in the customer's home.

Ameren Illinois customers switching from propane heating to electric may be eligible to receive a FREE Home Energy Assessment. Through this Assessment, a customer may be eligible to receive energy-saving upgrades at little to no cost, such as improved insulation, heating equipment and ventilation. Additionally, qualified customers may also receive no-cost appliance upgrades such as an air source heat pump, a heat pump water heater, an electric induction stove and an electric clothes dryer.

Eligibility

- Live in a single-family home.
- Ameren Illinois residential electric customer heating their home with propane.
- Maximum gross annual household income at or below the amount listed for your area on the Income Qualification Chart.

Website

For more information, to see if you qualify and to apply, visit AmerenIllinoisSavings.com/Electrification.

Talking Points

- The price of propane can be unpredictable, making it difficult to budget for your heating expenses. Make the switch to electric from propane to see consistency and start saving.
- Unlike propane and oil heating, electric heating costs remain stable. Electricity is currently a cheaper option for heating and is predicted to remain so for many years.
- With no burning materials, flammable gases or harmful fumes, electric heating is the safest possible heating solution for your home.
- The Ameren Illinois electric system is already connected to your home to deliver electricity in a reliable manner. You never need to worry about running low on fuel, scheduling tank refills or maintaining storage tanks.

Smart Savers Initiative

Overview

Customers living in eligible ZIP codes can receive a FREE smart thermostat with FREE professional installation through the Smart Savers Initiative if they are an Ameren Illinois residential customer heating their home with Ameren Illinois delivered fuel, natural gas or electric. Customers heating their home with propane are also eligible.

Eligibility

- Must be a residential customer of Ameren Illinois, heating your home with gas or electricity. Customers heating their home with propane are also eligible.
- Renters of single-family homes, 2-flat or 3-flat are eligible, with approval from landlord.
- Must live in a qualifying ZIP code. Check list of ZIP codes [here](#).
- Have never applied for and received a smart thermostat during the lifetime of the Ameren Illinois account.
- Must have home internet with Wi-Fi capabilities.

Website

To check eligibility and to apply go to AmerenIllinoisSmartSavers.com.

Talking Points

- Residential customers living in eligible ZIP codes can receive a free smart thermostat.
- Customer has the option to choose between a Google Nest Thermostat E or an ecobee lite.
- A certified professional Program Ally will install the thermostat at no cost.
- If customers do not qualify for the Smart Savers Initiative, please direct them to the Online Marketplace where they can find additional no-cost or low-cost smart thermostat options available. Many models are available for just \$5!
 - For more details, visit AmerenIllinoisEEMarketplace.com.

Small Business Initiative

Overview

Small Business customers can take advantage of incentives and discounts made just for them. The cost to power, heat and cool a small business can account for a substantial portion of a business's operating budget. To save money and boost their bottom line, eligible Small Business customers can take advantage of various incentives, discounted products and efficiency improvements.

Eligibility

On their bill, small business owners should look for "electric delivery" under the electric service non-residential bill detail to find their rate code. Eligible rate codes include DS-2 and DS-3A to participate in the Small Business Initiative.

Click [here](#) to see more examples of rate codes on a customer's bill.

Website

- To learn more about small business offerings visit AmerenIllinoisSavings.com/SmallBusiness.
- To request a FREE Energy Consultation visit cloud.ee.ameren.com/EnergyConsult.

Talking Points

Benefits of Energy Efficiency for Small Businesses

- **Profitability** — Increase your profits by lowering your operating costs with energy-saving products like LED lightbulbs, advanced power strips and smart thermostats.
- **Comfort** — Improve the comfort of your business for employees and customers with simple upgrades like insulation and updated appliances.
- **Reputation** — Enhance your brand reputation in the community as a sustainability leader and attract like-minded customers and employees.
