Energy Efficiency
PROGRAM

Is your business ready to grow?

The Ameren Illinois Energy Efficiency Program has dedicated services to help your business find, hire and retain qualified staff - at no cost to you.

The Ameren Illinois Energy Efficiency Program has a pipeline of qualified talent ready to work in the energy sector and help your business expand. Through the Workforce Development Program, your business gets connected with jobseekers within the Ameren Illinois service territory who have been trained to perform energy efficiency work under your guidance.

Ways the Workforce Development Program Helps Your Business Grow:

- Match you with qualified, vetted candidates across the state of Illinois who have been sponsored through BPI, HVAC and other relevant trainings.
- Draft and post job descriptions for you, so you can focus on running your business.
- Ongoing training and support for any candidates you hire from our network, including a library of over 50,000 on-demand computer-based trainings and on-site BPI training.
- Address other needs as you identify and share them - our program was created to serve YOU!

Additionally, we offer a jobs board as a free tool, in partnership with the Springfield Urban League, that employers can use to get their jobs opportunities in front of a captive audience.

Take advantage of this growth opportunity from the Ameren Illinois Energy Efficiency Program and see your business potential skyrocket!

Learn more about the Workforce Development Program at AmerenIllinoisSavings.com/Jobs or email workforce@ameren.com.
